How SAMs are tested ?

How SAMs are tested ?

Light cones

Luminosity Function

Stellar mass function

Morfology

Evolution of star formation rate

How SAMs are tested ?

Light cones

Luminosity Function

Colour-Magnitude distribution

Stellar mass function

Halo Mass Function

Bulge-Blackhole relation

Morfology

Evolution of star formation rate

How SAMs are tested ?

Light cones

Correlation Function

Luminosity Function

Colour-Magnitude distribution

Tully Fisher

SHAM

Stellar mass function

Halo Mass Function

Bulge-Blackhole relation

Stellar metallicity

Morfology

HOD

Evolution of star formation rate

How SAMs are tested ?

Light cones

Correlation Function

Luminosity Function

Colour-Magnitude distribution

SHAM

Tully Fisher

Stellar mass function

Halo Mass Function

Bulge-Blackhole relation

Stellar metallicity

Morfology

HOD

Evolution of star formation rate

How we will compare SAMs?

The HOD and the Correlation Function

Preparations before comparison :

- **The Halo Mass Function**
- **The number of galaxies in the samples**
- **The merger tree**

Halo Mass Function

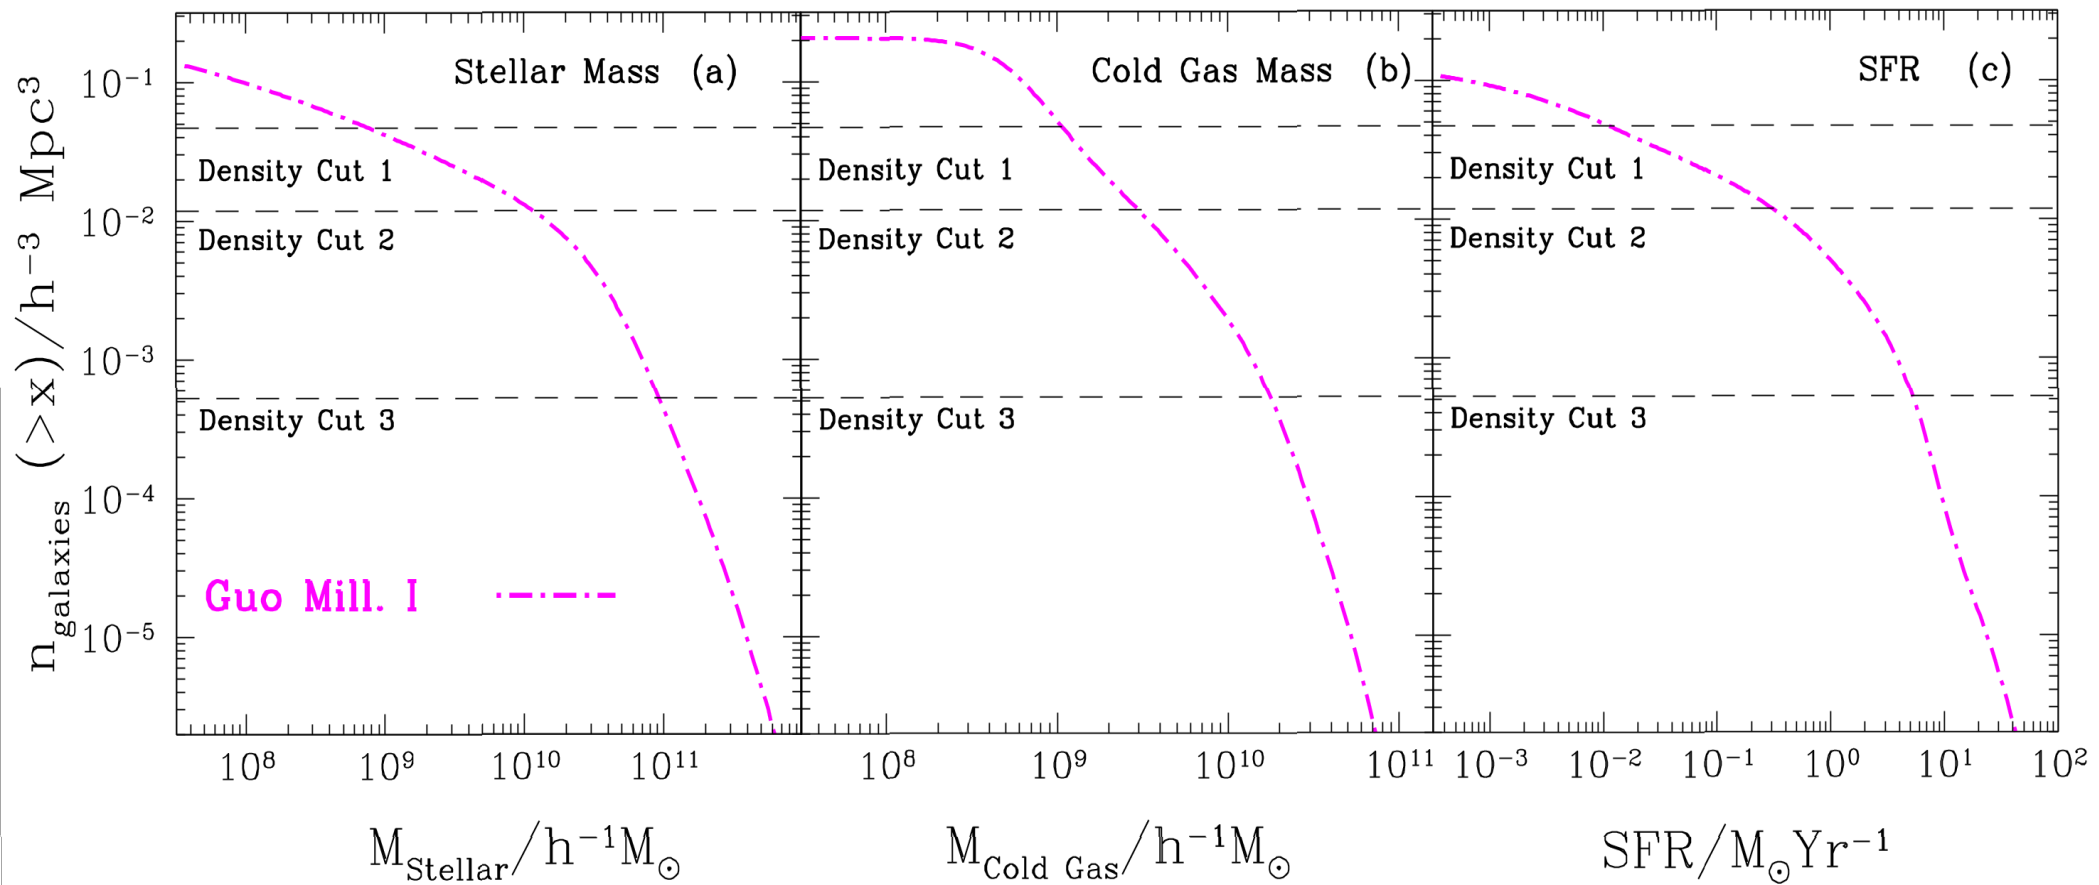

Halo Mass Function

And for other redshift?

Galaxy Samples

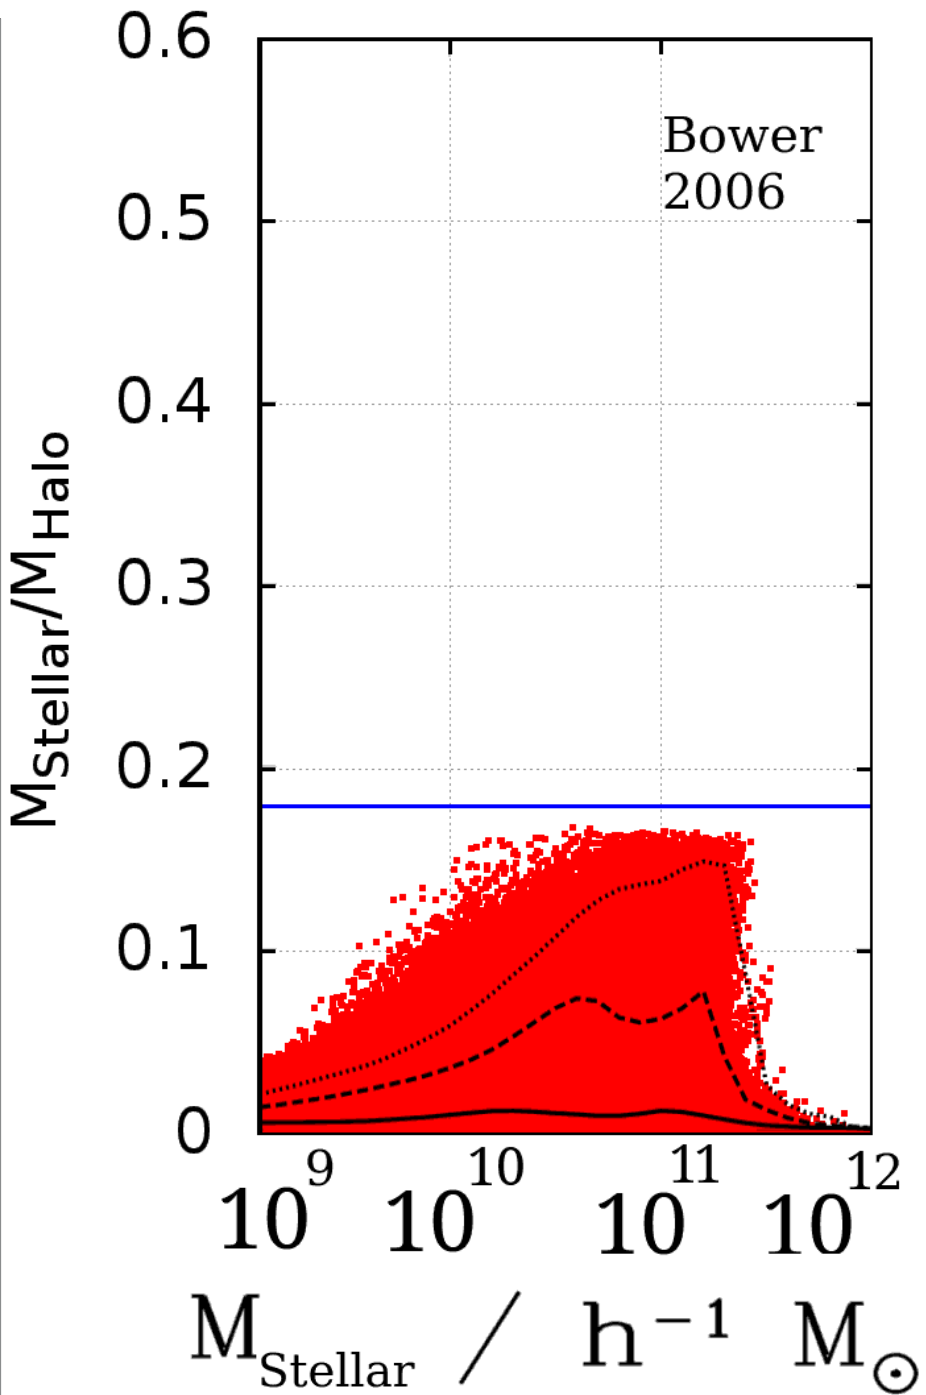

Prediction Completeness

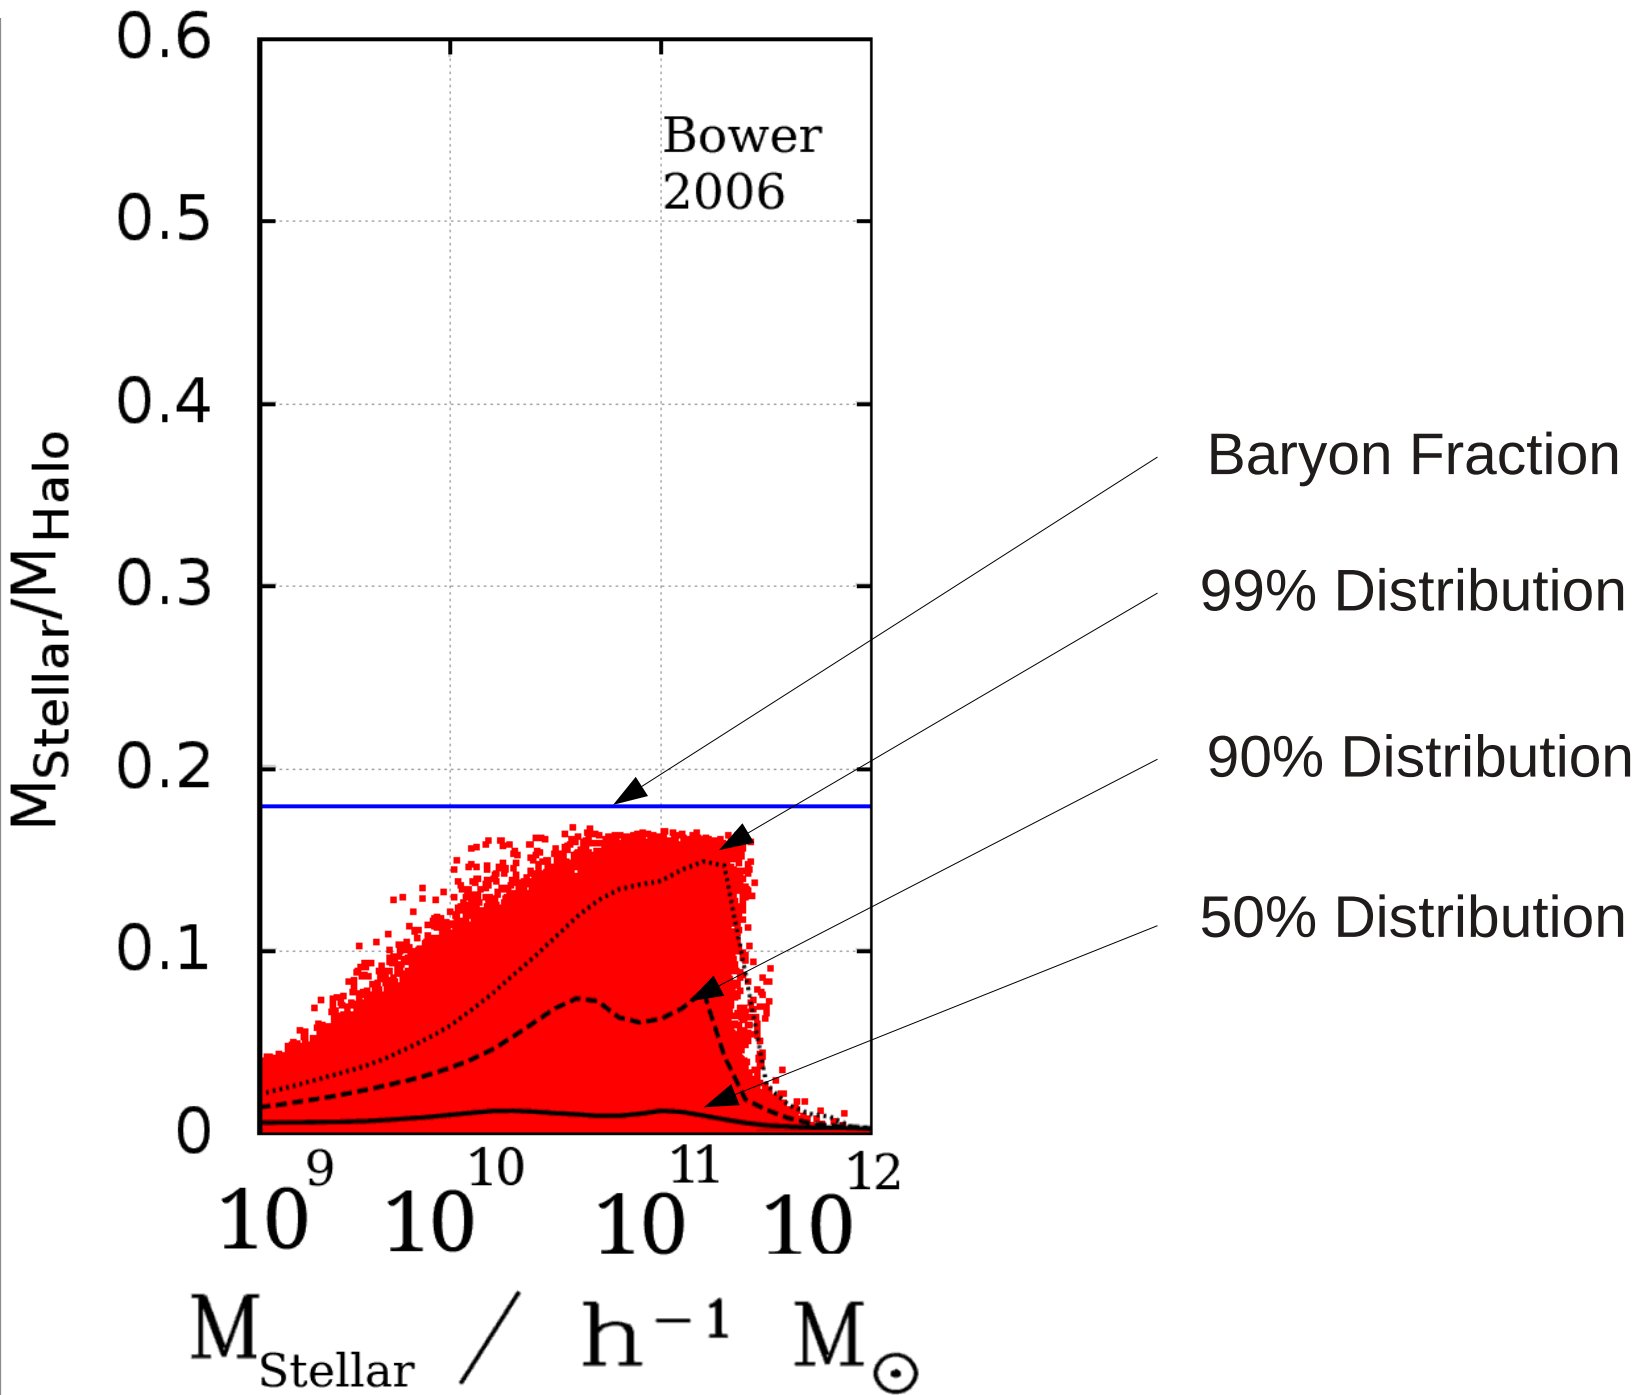

Number of galaxies

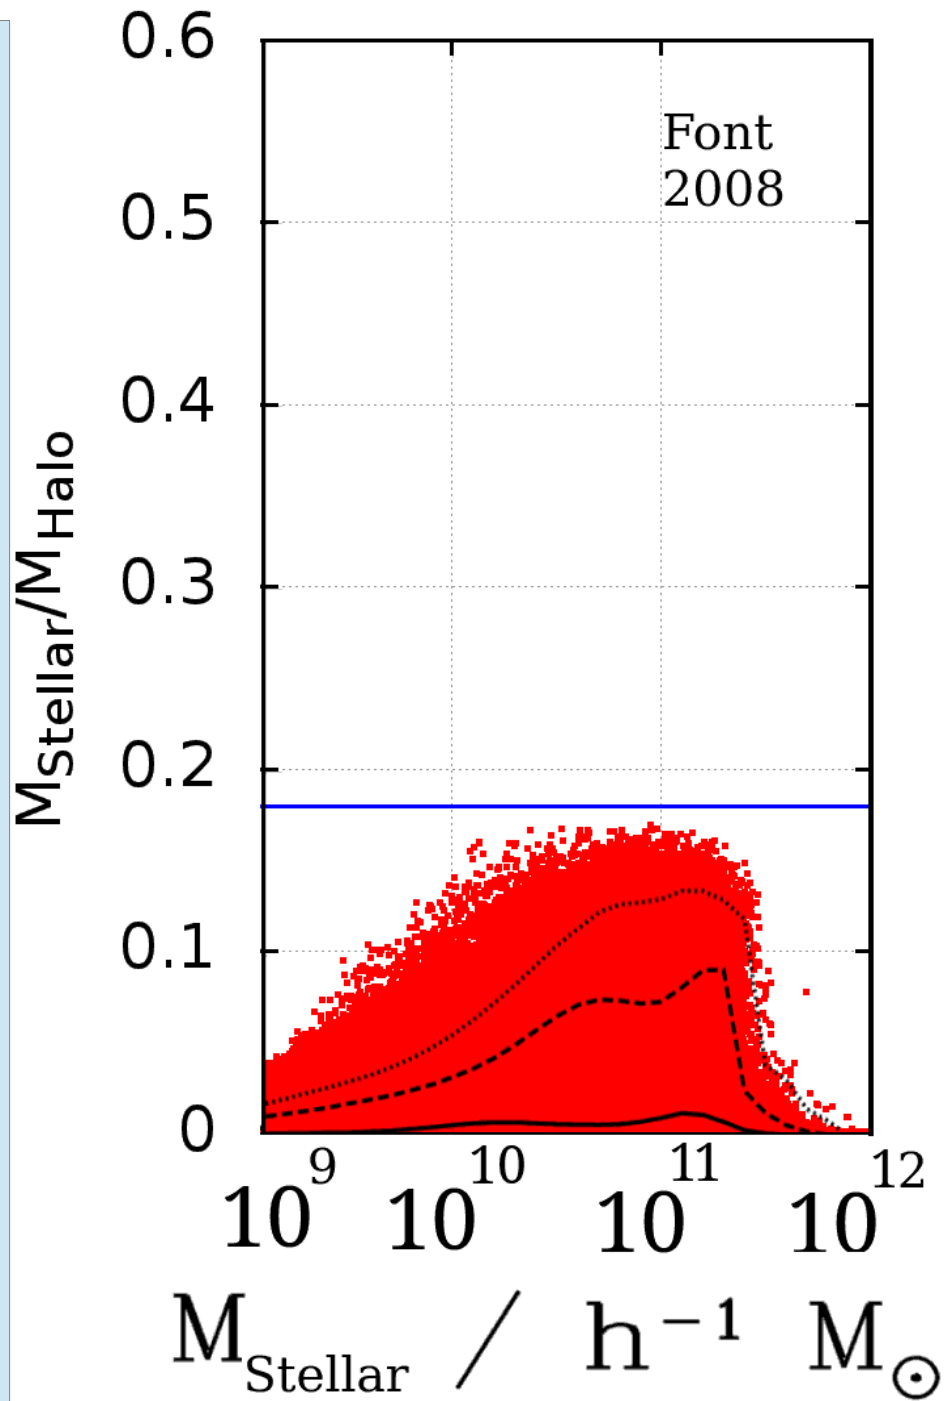

Stellar Mass-Halo Mass Relation

Stellar Mass-Halo Mass Relation

Stellar Mass-Halo Mass Relation

Stellar Mass-Halo Mass Relation

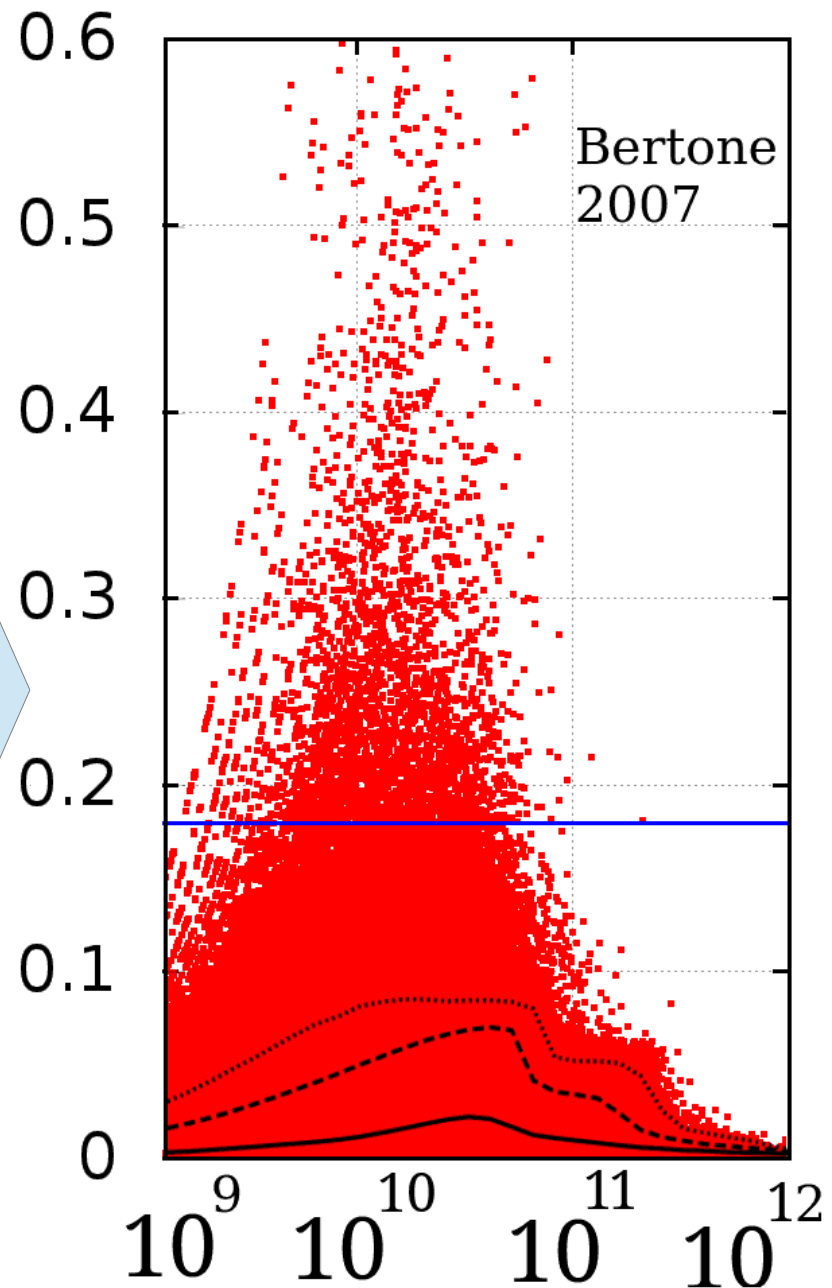

$M_{\text{Stellar}} / h^{-1} M_{\odot}$

Stellar Mass-Halo Mass Relation

$M_{\text{Stellar}} / h^{-1} M_{\odot}$

Stellar Mass-Halo Mass Relation

$M_{\text{Stellar}} / h^{-1} M_{\odot}$

Merger Tree Comparison

Stellar Mass Samples: Correlation

Stellar Mass Samples: Correlation

Disagreement in satellite part

Stellar Mass Samples: Correlation

Stellar Mass Samples: Radius

Cold Gas Mass Sample

Star Formation Rate Samples

Results

Cold Gas Mass and SFR

Number of satellite galaxies for the different Density Cuts, the different physical properties and the different models

Density Cut 2	Stell. Mass	Cold Gass Mass	SFR	Stell. Mass	Cold Gass Mass	SFR	Density Cut 3
Bower et al. 2006	40%	3%	3%	27%	2%	1%	Bower et al. 2006
Font et al. 2008	42%	8%	10%	26%	6%	2%	Font et al. 2008
DeLucia et, 2007	38%	6%	8%	24%	2%	4%	DeLucia et, 2007
Bertone et al. 2007	37%	9%	14%	27%	3%	6%	Bertone et al. 2007
Guo et al. 2011	41%	24%	19%	26%	15%	16%	Guo et al. 2011

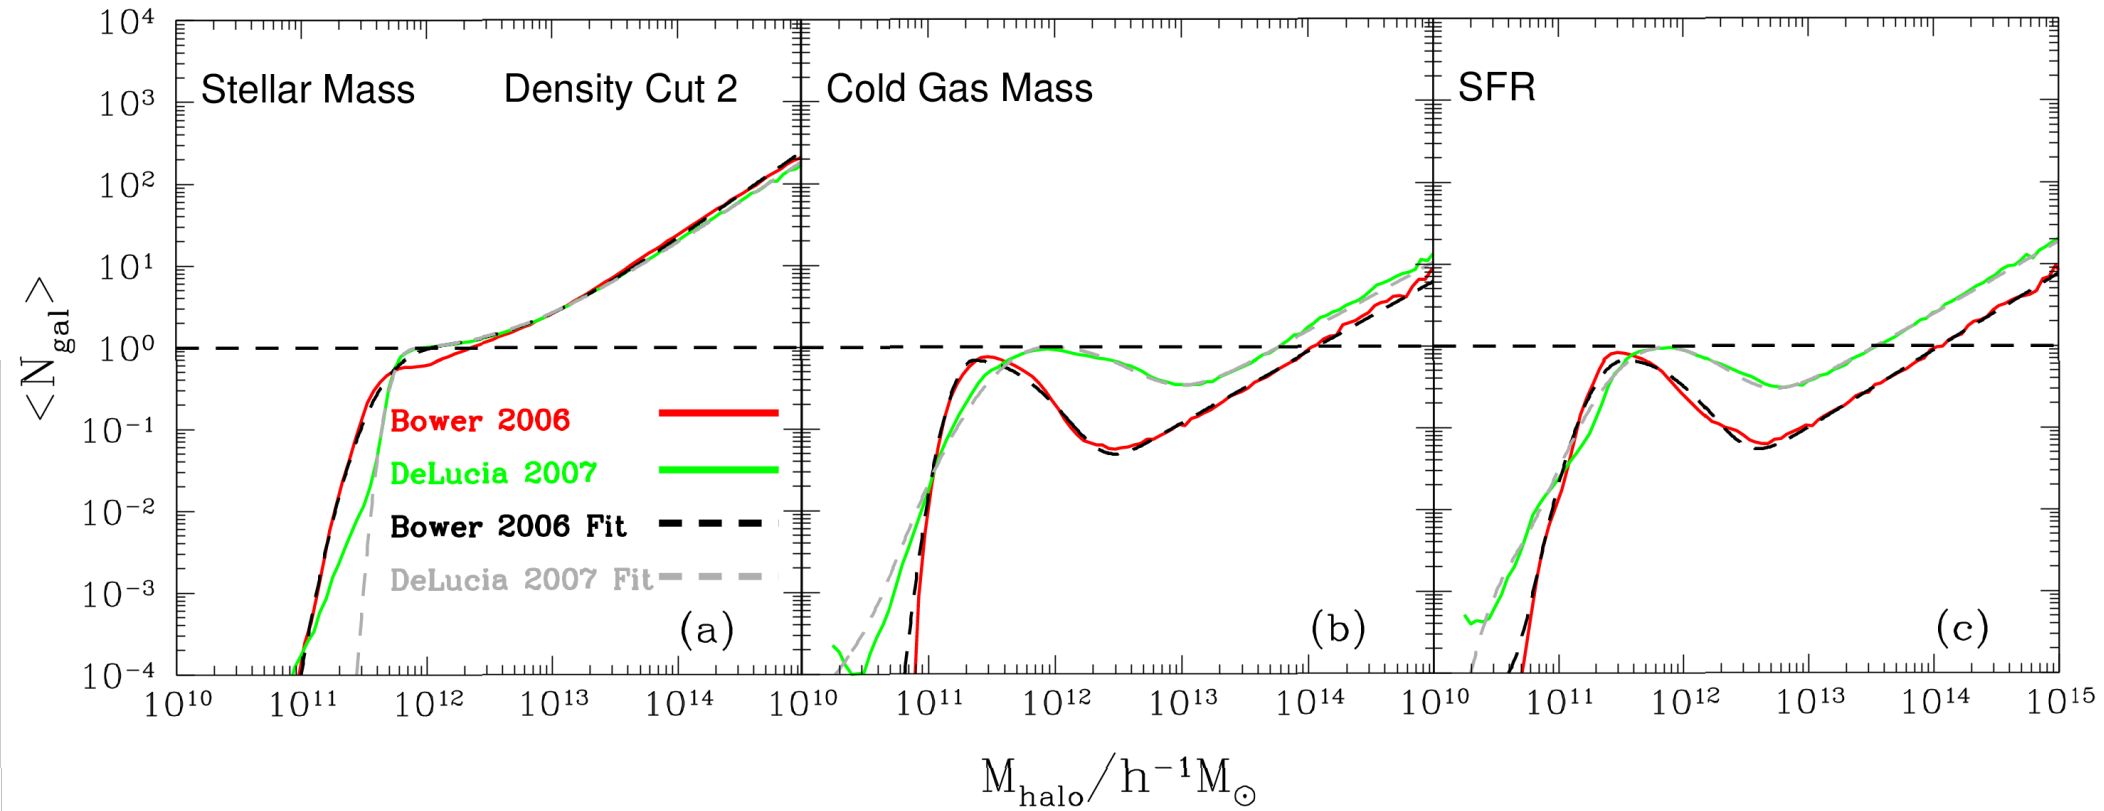

HOD Form

5 parameters fit presented
in Zehavi et al. 2005

9 parameter fit modified of the model presented
By Geach et al. 2012 and Zheng et al. 2007

HOD Fitting

5 parameters fit presented
in Zehavi et al. 2005

9 parameter fit modified of the model presented
By Geach et al. 2012 and Zheng et al. 2007

Conclusion

- Predicted HOD similar for Stellar Mass
- Different satellite distribution in small scales
- Predicted HOD, qualitatively similar in CG mass and SFR but different in detail
- Predicted HOD have different form: Stellar Mass, CG mass and SFR

Questions and Comments

Future Work

More HOD, SHAM and Millennium II

More modern models, SHAM, other redshift and Millennium I & II results:
