

# **Covid 19 Measures: Black Hole Disc Wind Conference**

## **Physical distancing**

The conference will be held in OCW017. This seminar room can hold around ~100 people with no social distancing, so the ~25 attendees can distribute themselves across the space. Seats are in blocks of 4, so use the seats at the end for 2m social distancing (current university protocol).

Masks should be worn EVERYWHERE in the building, including the seminar room (unless exempt)

The speaker is behind a Perspex screen, so they can take their mask off to present.

## **Cleaning & Hygiene**

Hand sanitizer and regular cleaning is provided.

Please use the ground floor toilets to avoid impacting other users of the building

## **Refreshments/lunches**

These will be served from the 2<sup>nd</sup> floor balcony area outside if the weather is fine. Otherwise they will be served from the counter area on the ground floor behind the seminar room. Food is individually wrapped or served with tongs.

## **Protect & detect**

Please take regular lateral flow tests. In particular, please confirm a negative result in advance of attending the conference and then again throughout the event.

Self LFT kits will be available to all delegates

In the event of testing positive, tell the conference administrators, and follow current government guidelines i.e. isolate immediately, and book a PCR test. If this also comes back positive then quarantine. Other conference delegates again following current government guidelines do NOT need to quarantine if they are double vaccinated, but daily LFT tests are then advisable.
