

The origin of cosmic structure

Inflation ($t \sim 10^{-35}$ s)

QUANTUM FLUCTUATIONS:

$$\left\{ \begin{array}{l} |\delta_k|^2 \propto k^n \quad n = 1 \\ \text{Gaussian amplitudes} \end{array} \right. +$$

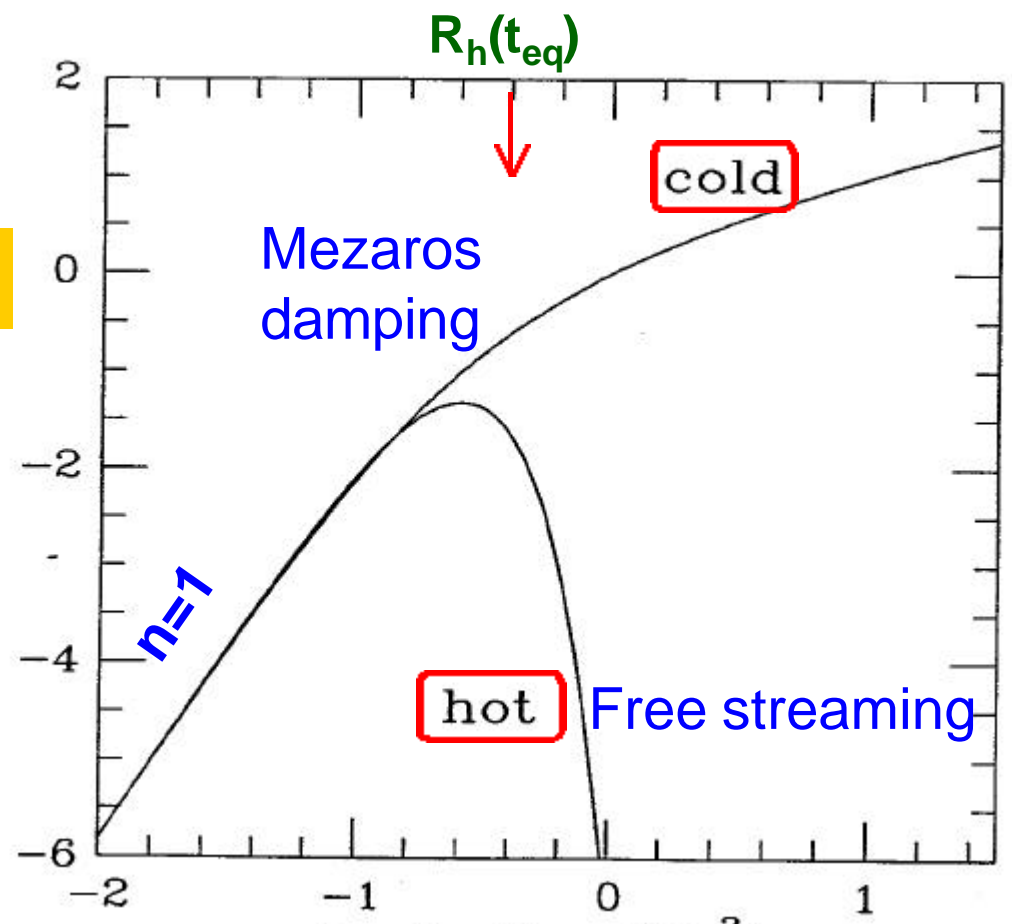

Damping (nature of dark matter)

$$P(k) = A k^n T^2(k, t)$$

Transfer function

$P(k)$

$\log(k^3 |\delta_k|^2)$

- Hot DM (eg ~30 eV neutrino)
 - Top-down formation
- Cold DM (eg ~neutralino)
 - Bottom-up (hierarchical)
